NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

1. NATURE OF OPERATIONS AND GOING CONCERN

Nevada Sunrise Gold Corporation (the "Company") was incorporated under the laws of British Columbia on April 3, 2007 and its registered head office is 231 Cherry Avenue, Suite 201 Auburn, CA 95603. On May 15, 2007 the Company acquired all of the issued and outstanding shares of Intor Resources Corporation ("Intor") by way of reverse takeover. Intor was incorporated under the laws of the State of Nevada on September 7, 2004 as Nevada Sunrise Exploration Limited. The name of that company was changed to Intor Resources Corporation in February, 2005. The Company's principal business activities include the acquisition, exploration and development of exploration and evaluation assets.

The Company is in the process of exploring and developing its exploration and evaluation assets. The recoverability of the amounts are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production.

The Company's condensed consolidated financial statements are prepared using International Financial Reporting Standards (IFRS) applicable to a going concern, which contemplates the Company will continue in operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. The Company will require additional financing or outside participation to undertake further exploration and subsequent development of its exploration and evaluation assets. Future operations of the Company are dependent on its ability to raise additional equity financing and the attainment of profitable operations.

As at March 31, 2013, the Company had working capital (excess of current assets over current liabilities) of \$733,638 (September 30, 2012 – \$994,068).

The Company has a relationship with Pilot Gold USA, Inc. a wholly-owned subsidiary of Pilot Gold, Inc., a Canadian company ("Pilot") at its Kinsley Mountain property (Note 6.) Pilot has acquired a 65% interest in the Kinsley Mountain Property by incurring an aggregate in excess of US\$3.0 million in exploration expenditures, the Company was notified this milestone was achieved by Pilot in February 2013. The Company will have an obligation (Note 11) to fund ("Cash Call") the cost of operating this property to the extent of its 35% interest. The formation of a joint venture is pending. The formation of a joint venture and exploration plans and budget for 2013 have not yet been finalized pending the finalization of the joint venture agreement. The Company intends to fund any future quarterly Cash Calls with outside capital. There is no assurance the Company will be able to raise this capital.

The condensed consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES

a) International Financial Reporting Standards

These condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (“IAS 34”) using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

These unaudited condensed consolidated financial statements do not include all of the information and footnotes required by IFRS for complete financial statements for interim reporting purposes but are in compliance with the standards required of interim financial statements described in IAS 34. Any subsequent changes to IFRS that are reflected in the Company’s consolidated financial statements for the year ending September 30, 2012 could result in restatement of these interim condensed consolidated financial statements. Results for the period ended March 31, 2013 are not necessarily indicative of future results.

These condensed consolidated interim financial statements should be read in conjunction with the Annual Financial Statements for the year ended September 30, 2012, which have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

b) Basis of preparation

These condensed consolidated financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information. All dollar amounts are stated in Canadian dollars unless otherwise specified.

The preparation of interim financial statements in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Significant areas requiring the use of estimates as the basis for determining the stated amounts include valuation of exploration and evaluation assets, depreciation of equipment, inputs used in the calculation of share-based compensation, and the fair value of convertible note payable. Actual results may differ from these estimates.

c) Basis of consolidation

The condensed consolidated financial statements incorporate the financial statements of the Company and the following subsidiary:

Name of subsidiary	Place of incorporation	Percentage ownership	Principal Activity
Intor Resources Corp.	USA	100%	Exploration of mining assets

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

c) Basis of consolidation (cont'd...)

The Company consolidates the subsidiary on the basis that it controls the subsidiary through its ability to govern its financial and operating policies.

Inter-Company balances and transactions are eliminated in preparing the condensed consolidated financial statements.

d) Equipment

Equipment is stated at cost less accumulated depreciation and accumulated impairment losses. The cost of an item of equipment consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Depreciation is recorded over the estimated useful lives of the assets on the straight line basis

Furniture and equipment	7 years
Computer equipment and software	3 years
Tenant improvements	5 years
Field equipment	7 years

An item of equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in profit or loss.

Where an item of equipment is composed of major components with different useful lives, the components are accounted for as separate items of equipment. Expenditures incurred to replace a component of an item of equipment that is accounted for separately, including major inspection and overhaul expenditures, are capitalized.

The assets' residual values, depreciation methods and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

e) Exploration and evaluation assets

Upon acquiring the legal right to explore a mineral property, all direct costs related to the acquisition of exploration and evaluation assets are capitalized. Exploration and evaluation expenditures incurred prior to the determination of the feasibility of mining operations and a decision to proceed with development are charged to operations as incurred.

Exploration costs are expensed as incurred as the Company is in the process of exploring its mineral tenements and has not yet determined whether these properties contain ore reserves that are economically recoverable. If and when the Company's management determines that economically extractable proven or probable mineral reserves have been established, the subsequent costs incurred to develop such property, including costs to further delineate the ore body will be capitalized.

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

e) Exploration and evaluation assets (cont'd...)

Development expenditures incurred subsequent to a development decision, and to increase or to extend the life of existing production, are capitalized and will be amortized on the unit-of-production method based upon estimated proven and probable reserves. When there is little prospect of further work on a property being carried out by the Company, the remaining deferred costs associated with that property are charged to operations during the period such determination is made.

The Company assesses exploration and evaluation assets for impairment when facts and circumstances suggest that the carrying amount of an asset may exceed its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

f) Decommissioning, restoration and similar liabilities ("asset retirement obligations")

The Company recognizes liabilities for legal or constructive obligations associated with the retirement of mineral properties and equipment. The net present value of future rehabilitation costs is capitalized to the related asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value.

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related assets with a corresponding entry to the rehabilitation provision.

The increase in the provision due to the passage of time is recognized as interest expense.

The Company had no asset retirement liabilities as at March 31, 2013 or September 30, 2012.

g) Foreign currency translation

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currency of Nevada Sunrise Gold Corp. is the Canadian dollar and the functional currency of Intor Resources Corp. is the United States dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*.

Transactions and balances

Foreign currency transactions are translated into the relevant functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of loss and comprehensive loss.

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

g) Foreign currency translation (cont'd...)

Translation of subsidiary results into the presentation currency

The results and statements of financial position of all the Company's subsidiaries with functional currencies different from the presentation currency are translated into the presentation currency as follows:

- 1) Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of the statement of financial position;
- 2) Income and expenses for each statement of income are translated at average exchange rates, unless the average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions; and
- 3) All resulting exchange differences are recognized as accumulated other comprehensive income (loss), a separate component of equity.

h) Related party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

i) Share-based compensation

The stock option plan allows Company employees, directors and consultants to acquire shares of the Company. The fair value of options granted is recognized as a share-based compensation expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee. Consideration paid on the exercise of stock options is credited to capital stock and the fair value of the options is reclassified from reserves to capital stock.

The fair value is measured at grant date and each tranche is recognized over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the number of stock options that are expected to vest.

j) Income taxes

Current tax is the expected tax payable or receivable on the local taxable income or loss for the period, using local tax rates enacted or substantively enacted at the financial position reporting date, and includes any adjustments to tax payable or receivable in respect of previous periods.

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

j) Income taxes (cont'd...)

Deferred income taxes are recorded using the statement of financial position liability method whereby deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the financial position reporting date. Deferred tax is not recognized for temporary differences which arise on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting, nor taxable profit or loss.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

k) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

l) Financial assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through profit and loss. The Company's cash is classified as FVTPL.

Financial assets classified as loans and receivables and held to maturity assets are measured at amortized cost. The Company's receivables are classified as loans and receivables. Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income and loss except for losses in value that are considered other than temporary which are recognized in profit or loss. At September 30, 2012, or March 31, 2013 the Company has not classified any financial assets as available for sale.

Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

m) Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. The effective interest rate method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Company's accounts payable and accrued liabilities are classified as other financial liabilities.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value recognized in profit or loss unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized in profit or loss.

n) Derivative financial instruments

The Company's convertible note payable was treated as a derivative financial liability. The estimated fair value, based on the Black-Scholes model, was adjusted on a quarterly basis with gains or losses recognized in the statement of net loss and comprehensive loss. The Black-Scholes model was based on significant assumptions such as volatility, dividend yield and expected term. During the year ended September 30, 2012 the interest-bearing convertible note was settled in full.

o) Impairment

At the end of each reporting period the carrying amounts of the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs. Following the recognition of an impairment loss, the depreciation charge applicable to the asset is adjusted prospectively in order to systematically allocate the revised carrying amount, net of any residual value, over the remaining useful life.

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

o) Impairment (cont'd...)

Where an impairment subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate and its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior periods. A reversal of an impairment loss is recognized immediately in profit or loss.

p) Capital stock

Common shares are classified as capital stock. Incremental costs directly attributable to the issue of common shares are recognized as a deduction from equity, net of any tax effects.

3. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. In the management of capital, the Company includes components of shareholders' equity.

The properties in which the Company currently has an interest are in the exploration stage; as such the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during six months ended March 31, 2013. The Company is not subject to externally imposed capital requirements.

4. FINANCIAL INSTRUMENTS

The fair value of the Company's due from related parties, other current assets, accounts payable and accrued liabilities, and due to related parties approximate their carrying value, because of the short-term nature of these instruments.

NEVADA SUNRISE GOLD CORP.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

4. FINANCIAL INSTRUMENTS (cont'd...)

The following table illustrates the classification of the Company's financial instruments within fair value hierarchy as at:

	Level 1	Level 2	Level 3
March 31, 2013:			
Cash	\$ 763,144	\$ -	\$ -
	<u>\$ 762,144</u>	<u>\$ -</u>	<u>\$ -</u>
September 30, 2012			
Cash	\$ 1,013,031	\$ -	\$ -
	<u>\$ 1,013,031</u>	<u>\$ -</u>	<u>\$ -</u>

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's management believes it has no significant credit risk.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at March 31, 2013, the Company had a cash balance of \$762,144 (September 30, 2012 - \$1,013,031) to settle current liabilities of \$38,719 (September 30, 2012 - \$33,919).

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

a) Interest rate risk

The Company has cash balances. The Company is not at a significant risk to fluctuating interest rates. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions or short-term debt instruments issued by the federal government. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. As of September 30, 2012 and March 31, 2013, the Company did not have any investments in investment-grade short-term deposit certificates or short-term debt issued by the federal government.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2013
(Presented in Canadian Dollars)
(Unaudited)

4. FINANCIAL INSTRUMENTS (cont'd...)

Market risk (cont'd...)

b) Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to cash and accounts payable, accrued liabilities, and convertible note payable that are denominated in US Dollars or Canadian Dollars and will be converted to the other currency.

c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Sensitivity Analysis

The Company operates in the United States and is exposed to risk from changes in the US dollar. A 10% fluctuation in the US dollar against the Canadian dollar would affect net loss for the six months ended March 31, 2013 by approximately \$56,000.

6. EXPLORATION AND EVALUATION ASSETS

Title to exploration and evaluation assets interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous historical title conveyance characteristic of many mineral claims. The Company has investigated title to all of its exploration and evaluation asset interests and, to the best of its knowledge, title to all of its interests are in good standing. The exploration and evaluation asset interests in which the Company has committed to earn an interest are located in the United States.

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Iron Point and Juniper, Nevada

The Company had mining lease agreements with a company of which an officer and director of the Company is managing director and has a minority interest (Note 8) for two properties: Iron Point and Juniper. The Iron Point and Juniper agreements included a net smelter royalty on production of 2% and required advance minimal royalty of US\$100,000 per property. Both the Iron Point and the Juniper agreements were terminated June 2011 and all related acquisition costs have been expensed.

Kinsley Mountain, Nevada

The Company also has a mining lease agreement with a company of which an officer and director of the Company is managing director and has a minority interest (Note 8) for the Kinsley Mountain Property. The Kinsley Mountain agreement has a sliding scale net smelter royalty rate on production from 2% to 5% depending on the price of gold and requires an annual advance minimum royalty. In 2011, the Company and the related party amended certain provisions of the mining agreement including the expiration date and the timing of advance minimum royalty payments for no additional consideration. The agreement now runs through June 2020; however Company has the right to terminate the mining lease with the related party upon thirty days written notice; or to extend the lease beyond 2020 provided the Company continues to make advance minimum royalty payments. Per the lease agreement, beginning June 2012, the Company has an obligation to expend a minimum of US\$500,000 annually in exploration, development and mining activities on the Kinsley Mountain Property. The Company anticipates that the required minimum annual work obligation will be fulfilled by Pilot Gold's exploration expenditures, as discussed below.

In March 2010, the Company entered into an agreement with Animas Resources Ltd ("Animas"), whereby the Company agreed to grant Animas an option to acquire a 51% interest in the Kinsley Mountain property.

Effective September 2011, Animas conveyed its interest in the agreement to Pilot Gold USA Inc., a wholly-owned subsidiary of Pilot Gold, Inc., a Canadian company ("Pilot"). Pilot has acquired a 65% interest in the Kinsley Mountain Property by incurring an aggregate in excess of US\$3.0 million in cumulative eligible exploration expenditures, the Company announced this milestone was achieved by Pilot in April 2013, and having paid all annual property maintenance fees, advance royalty payments, and mining lease payments. As a result of Pilot having achieved this milestone and when the joint venture is formed upon the finalization of the joint venture agreement, the Company will have an obligation (Note 11) to fund ("Cash Call") the cost of operating this property to the extent of its 35% interest. The formation of a joint venture and exploration plans and budget for 2013 have not yet been finalized pending the finalization of the joint venture agreement. The Company intends to fund any future quarterly Cash Calls with outside capital. There is no assurance the Company will be able to raise this capital.

Future advance minimum royalty payments, which pursuant to agreement are to be paid by Pilot Gold or the joint venture entity, are as follows:

June 1:	US\$ Advance Minimum Royalty
2013-2016	\$50,000
2017	75,000
2018	100,000
2019	150,000
2020 (and each thereafter)	200,000

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Pinnacle, Nevada

Effective January 2011, the Company completed an agreement with a company of which an officer and director of the Company is managing director and has a minority interest (Note 8) covering the Pinnacle property. The agreement included a sliding scale net smelter royalty on production from 2.5% to 5% depending on the price of gold. The Company could terminate the agreement by giving written notice prior to July 1 of the year of its determination and executing a quitclaim deed conveying its interest in the property to the related party. The parties agreed to change the terms of this agreement to 1) enable either party to terminate the agreement with 30 days notice in first two years of the agreement; 2) have the NSR be 4% of which two points may be purchased by the Company any time after completion of a feasibility study; 3) extend the agreement through 2022; 4) require future advance minimum royalty payments as follows.:

	US\$ Advance Minimum Royalty
2013 (monthly USD\$1,000 instalments)	\$ 6,000
2014 (monthly USD\$1,500 instalments)	15,000
2015 (annual payment)	30,000
2016-2022 (annual payments each year)	60,000

In addition, the Company must pay annual property maintenance fees and has no minimum work commitment for 2013 and 2014 and a minimum work commitment of US\$50,000 for the 2015 and a minimum work commitment of \$100,000 for 2016. As of March 31, 2013, the Company has paid an affiliated company of which an officer and director of the Company is managing director and has a minority interest (Note 8) all the advance minimum royalty payments due, US\$3,000, for the six months ended March 31, 2013 and the payments for April, 2013 and May, 2013, US\$1,000 each, have also been remitted by the Company. The Company and the affiliated company are both working to complete an updated agreement to reflect the new terms.

7. CAPITAL STOCK AND CONTRIBUTED SURPLUS

- a) Authorized: Unlimited common shares, without par value
- b) Issued: As of March 31, 2013 96,673,175 common shares were issued and outstanding.

In January 2013 and November 2012, a total of 1,618,000 warrants were exercised at a price of \$0.10 per common share yielding the Company proceeds of \$161,800.

In April 2012, the Company converted a US\$290,000 convertible note payable into 4,142,858 Units. Each Unit consisted of one common share of the Company and one-half of one common share purchase warrant. Each whole warrant entitled the holder to acquire an additional common share at an exercise price of \$0.12 exercisable until March 25, 2013.

Also in April 2012, a total of 256,667 warrants were exercised at a price of \$0.10 per common share yielding the Company \$25,667.

7. CAPITAL STOCK AND CONTRIBUTED SURPLUS (cont'd...)

In March 2012, the Company completed three separate private placements as follows:

- i) The Company completed a non-brokered private placement of 2,857,140 units (the "Units") at a price of \$0.07 per Unit. Each Unit consisted of one common share of the Company (a "Share") and one common share purchase warrant (a "Warrant"). Each whole Warrant entitles the holder to purchase an additional common share (a "Warrant Share") at an exercise price of \$0.10 per Warrant Share until March 16, 2014.
- ii) The Company completed a private placement, of units (the "Units") at a price of \$0.12 per Unit (the "Offering"). A total of 16,700,000 Units were issued, for total proceeds of \$2,004,000. Each Unit consisted of one common share of the Company (a "Share") and one half of one common share purchase warrant (a "Warrant"). Each whole Warrant entitles the holder to purchase an additional common share (a "Warrant Share") at an exercise price of \$0.20 per Warrant Share for a period of 24 months from the date of issuance, subject to earlier expiry at any time after four months and one day from the date of issuance, at the option of the Company, if the daily volume weighted average price of the common shares of the Company is greater than \$0.32 per share over a period of 20 consecutive trading days, in which case the Company may accelerate the expiry date of the Warrants by giving notice to the holders thereof and in such case the Warrants will expire on the 30th day after the date on which such notice is given by the Company. In consideration for the services provided by the Agent, the Company issued to the Agent 1,586,667 Units, at a value of \$0.12 per Unit, which consisted of one share and one half of one share purchase warrant. Each full share purchase warrant is exercisable at \$0.20 per share. The units were valued at \$190,400 using the share price at the concurrent offering of \$0.12 and were re-classed as a share issue cost.

The Company also completed a non-brokered private placement. The Company issued 6,250,000 Units (the "Units") at a price of \$0.12 per Unit. Each Unit consisted of one common share of the Company (a "Share") and one-half of one common share purchase warrant (a "Warrant"). Each whole Warrant will entitle the holder to purchase an additional common share (a "Warrant Share") at an exercise price of \$0.20 per Warrant Share for a period expiring March 23, 2014. If the Company's common shares trade at a daily volume weighted average price of greater than \$0.32 per share for a period of 20 consecutive trading days at any time after four months and one day after the closing, the Company may accelerate the expiry date of the Warrants by giving notice to the holders notice thereof and in such case the Warrants will expire on the 30th day after the date on which such notice is given by the Company.

In addition, in March 2012, a total of 256,667 warrants were exercised at a price of \$0.10 per common share yielding the Company \$25,667.

Warrants exercised	<u>(1,618,000)</u>	<u>0.10</u>
Balance as at March 31, 2013	15,125,472	\$ 0.18

At March 31, 2013, warrants were outstanding enabling holders to acquire Common Shares as follows:

Number of Warrants	Exercise Price	Expiry Date
12,268,332	\$ 0.20	March 23, 2014
2,857,140	0.10	March 16, 2014

d) Options

The Company has a stock option plan whereby it may grant options to employees, directors, consultants and certain other service providers. The maximum aggregate number of shares that may be reserved for issuance under the plan is 10% of the Outstanding Shares, less any common shares reserved for issuance under share options granted outside of this plan. Options are exercisable for a maximum of 10 years. Option shares are subject to vesting requirements as determined by the Company's Board of Directors.

The Company recognizes share-based compensation expense for all stock options based on the fair value based method of accounting. The fair value attributable to options vesting during the period was \$155,071 for the six months ended March 31, 2013 (for the six months ended March 31, 2012 - \$446,807). 1,700,000 options were granted during the six months ended March 31, 2013 (2,425,000 were granted for the six months ended March 31, 2012).
